Summary

Experienced Front-End Developer with almost three years of hands-on expertise in both web and mobile application development. Specializing in translating design concepts into user-friendly interfaces, I have a proven track record of delivering high-quality projects that exceed user expectations. Collaborative and adaptable, I thrive in fast-paced environments. Eager to contribute my skills to innovative web and mobile development initiatives.

Axies-NFT-Market-Place: My JavaScript Debut ⧉
Technologies: Javascript, sass

- Axies-NFT-Market-Place is not just a project; it's my JavaScript initiation. As my first venture into pure JS development, this marketplace is dedicated to showcasing animated monsters as Non-Fungible Tokens (NFTs). It represents my passion for merging creativity with code, setting the stage for future innovative projects.
